

How to start on Geneafinder?

You can start in two ways :

Complete the tree

Add people and create connections between them to grow your family tree.

Import a file

Import a tree created on another software, exported in a GEDCOM UTF-8 format file.

Manage your viewing and export preferences in the configuration panel

Click on the  icon to access the configuration panel (at the top of each page).

Then click on the useful menus to manage your settings.

Tree visualization

Export the tree

Regularly export your tree to keep a copy

Export the tree

Your tree will be downloaded and saved in .ged UTF-8 format on your computer. It is not necessary to import it again after an export.

Need help? Any questions?

Help is available in each menu - click on the icon  at the top of each page.

The Resources menu lists our tips and advice.
